

NAME
DwmpSetColorization (DWMAPI.#104)
PROTOTYPE
HRESULT DwmpSetColorization (DWORD dwColorizationColor, BOOL bTransparencyEnabled, BYTE cOpacity);
DESCRIPTION
Set the color intensity, color, and opacity of glass used in higher Aero tiers.
PARAMETERS
dwColorizationColor [in] – Color of glass and its intensity in ARGB value format. bTransparencyEnabled [in] – Specify whether or not transparency is enabled. cOpacity [in] – Opacity of glass, if transparency is enabled.
RETURNS
ERROR_SUCCESS is returned upon success. 0x80263001 is returned if DWM composition is not enabled or working properly. To get extended error information, call GetLastError().
NOTES
Changes made to glass colorization using this function do not persist across reboots. To persist changes, write the value of dwColorizationColor to Software\Microsoft\Windows\DWM\ColorizationColor. Also write the value of bTransparencyEnabled to Software\Microsoft\Windows\DWM\ColorizationOpaqueBlend. Persisting opacity level changes is not supported(?) .
